

# Our Core Values

At Families Choice Home Care, we're dedicated to providing high-quality home care services for non-medical home care for seniors, the elderly, and disabled adults. To ensure we deliver the best quality home care services, we base everything we do on our core values.

- **Compassion** – To understand and empathize with the needs and concerns of our team members and clients alike without passing judgment and work in good faith to address any concerns.
- **Integrity** – Ensuring we collectively act with strong moral and ethical values not only to other team members, but to our clients and our community. To work as a team, hold one another accountable, and to be honest even when it is difficult to do so.
- **Advocacy** – We champion the needs and concerns of our clients to provide a safe, caring, and comfortable home environment. We speak up for our clients when there is no one else to do so to ensure we are doing what is in their best interest.
- **Professionalism** – The quality in which we exceed industry standards and produce greater efficiencies in our work and to the clients we serve.
- **Commitment** – Our pledge to give our time and energy, and to provide any tools necessary to the members of our team to effectively fulfill their duties to our senior community.

## Is Assisted Living for Seniors Right for Your Loved One?

Assisted living for seniors is right for some senior citizens. But it's definitely not the best choice for everyone.

If the senior in your life is more comfortable at home, consider taking advantage of the senior home care services available to you. Whether you only need to use the services a few hours every week or you need them 24/7, they'll allow your loved one to get the care they need in the privacy of their own home.

Contact us to learn more about how home care services can prove to be very beneficial for many seniors.
